How much do solar panels cost?

The price per watt for solar panels can range from \$2.50 to \$3.50 and largely depends on the home's geographical area. Residential solar panels are usually sized between 3 kW and 8 kW and can cost anywhere from \$7,500 to \$28,000 in total installation costs. See average solar panel system costs by size (before tax credits or discounts).

How much does a solar system cost in 2024?

In 2024, the average cost for a solar panel installation is about \$2.50 to \$3.50 per watt. For example, a 6 kW system might cost between \$15,000 and \$21,000 before any tax credits or incentives. Cost After Incentives: Federal and state incentives can significantly reduce the cost of your solar project.

How much does solar cost per watt?

The industry standard measurement for comparing solar costs is price per watt (\$/W). According to the National Renewable Energy Laboratory's Spring 2025 Solar Industry Update, residential solar costs average around \$2.56 per watt before incentives, with most systems ranging from \$2.56 to \$3.03 per watt. Factors affecting cost per watt include:

How much does solar cost in 2025?

Solar panel costs have reached historic lows in 2025, making home solar more affordable than ever before. With the average residential solar system costing between \$20,000 and \$30,000 before incentives, and the federal 30% tax credit scheduled to step down after 2025, now is an optimal time to invest in solar energy.
