Does the port of Aarhus have a shore power plant?

The Port of Aarhus has an onshore power plant on its way to container ships, which will be the first of its kind in Denmark. And a new agreement stipulates that it must be supplied by Danish PowerCon. We are pleased that we can once again collaborate with PowerCon to establish a shore power facility.

What is a container ship facility in Aarhus?

The facility, designed specifically for container ships, will mark the first of its kind in Denmark and solidify the Port of Aarhus's commitment to green transformation. Under the agreement, Danish company PowerCon will supply the transformer station and power management system for the project.

When will Aarhus' shore power project be operational?

The facility is expected to be operational by 2026, furthering the port's efforts to become a leader in sustainable port operations. The shore power project is part of the "OPS Network," a collaborative initiative involving key Northern European ports, including Aarhus, Gothenburg, Bremerhaven, and Stockholm.

ANDRITZ AG, a global leader in sustainable industrial solutions and advanced clean air technologies, has been selected by Danish utility Kredslob to deliver a large-scale ...
