Community housing projects in New York City have successfully deployed microgrid adaptation measures for extreme weather events and high electricity bills. The Marcus Garvey Village ...

System Owner: L+M Development Partners (Solar), Demand Energy (Storage), Bloom Energy (Fuel Cell)
Project Goal: Energy savings, backup power, and improved grid reliability

Electrical power system of an apartment building (APB), including electric vehicles (EVs), photovoltaic (PV) generation, and battery energy storage systems (BESS).

By coupling on-site renewables with energy storage, organizations can use on-site electricity for more hours of the day and further reduce emissions from energy use. Better Buildings works ...

This study proposes an EMS for electrified APBs aimed at achieving economic and social benefits for building managers and households through a two-stage structure from ...

Combined heat and power (CHP) and on-site renewables developer Digital Energy and Zinc8 Energy Solutions have agreed to install the latter's 100-kW/1.5-MWh zinc-air energy ...

DING ENERGY SYSTEMS NYCEEC's experience in financing the battery portion of a renewable-energy-plus-storage microgrid in an affordable housing development reveals both the ...

Apartment energy storage power stations are innovative systems designed to enhance energy efficiency, reduce costs, and support sustainable living within residential ...

We're breaking down the nuts and bolts of energy storage systems for multi-family housing - no jargon, just

actionable insights. Oh, and we'll throw in a joke about solar panels and vampires.

Find information on energy storage value streams, project and feasibility funding, and technical assistance.
