---

The vehicles run exclusively on solar energy - a masterpiece of efficiency, lightweight construction and engineering. With the new "Silvretta" vehicle, the team will be at the starting line in 2025 - ...

With ambitious government targets and growing consumer demand, the Austrian solar sector continues to expand rapidly. This comprehensive guide examines the top 10 solar companies ...

Europe-wide solution center for solar energy and photovoltaics issues in Satteins (Austria).

Our partners in the automotive industry place particularly high demands on the quality of steering systems, irrespective of vehicle type. We satisfy these high demands for safety components ...

As the system extends over several of the factory's roofs, various solar mounting systems and solutions from Schletter were used. ...

Scientists in Austria have conducted a risk analysis for four setups for coupled PV-electrolyser systems, and tested them under three use cases.

This paper presents the design and analysis of the Suspension, Steering, and Traction Systems for a solar-powered car, as part of a larger eco-friendly transportation project.

Scientists in Austria have conducted a risk analysis for four setups for coupled PV-electrolyser systems, and tested them under three ...

Our partners in the automotive industry place particularly high demands on the quality of steering systems, irrespective of vehicle type. We satisfy ...

As the system extends over several of the factory's roofs, various solar mounting systems and solutions from Schletter were used. The modules were mounted on the flat roof ...

In Austria, the most important decisions regarding the commissioning of PV systems are the responsibility of the federal states. Even if the national targets are now ambitious - 21 TWh by ...

The system is located on the factory roofs of the automotive and commercial vehicle manufacturer Steyr Automotive in the Upper Austrian town of Steyr. In future, the company will ...
