What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

Does unified power offer battery cabinets?

Unified Power offers a complete line of battery cabinets for both UPS and Telecom Applications. These cabinets can be configured to match OEM cabinets and offer a competitive option for system upgrades or new projects. Features Space saving foot print is the industry's most compact design.

What is a C&C power battery enclosure?

C&C Power Battery enclosures are configured to meet the need of all types of applications. Battery cabinets are engineered for an uninterrupted power backup source to support the continuous operation of your critical facility.

What is a SBC & how does it work?

The SBC is constructed of a high strength nylon polymer with corrosion resistant hardware. The cap of the SBC features an integrated tether point and a double seal to keep out moisture. Many modern configurations include not only a white light requiring a battery, but also a laser device of some type, not to mention night vision devices too.

Install the main POS and NEG cables from the output circuit breaker to the correct battery posts on the designated battery units shown in the provided battery system schematic.

Battery cabinets are engineered for an uninterrupted power backup source to support the continuous operation of your critical facility.
