-----

The battery pack is formed by collecting several modules adding a battery management system (BMS) and a cooling device. Cells come together to ...

We produce and assemble aluminum extrusions for electric car battery tray (also called ev battery tray, ev battery box, or ev battery enclosure). We ...

Through an extensive catalogue of fabrication capabilities, including high accuracy CNC machining and MiG / TiG welding, we can develop your long-length extrusions into ...

Extrusion solves these problems by compressing the pack into a rigid, unified form, reducing gaps and securing every cell in place. It ...

Modular battery frames using aluminum extrusion accommodate various cell configurations and pack sizes. You can integrate mounting points, cable routing channels, and ...

There are a number of vehicles that take advantage of the attributes of aluminum extrusions to produce high-performance battery systems and ...

Extrusion solves these problems by compressing the pack into a rigid, unified form, reducing gaps and securing every cell in place. It also prepares the pack for subsequent ...

There are a number of vehicles that take advantage of the attributes of aluminum extrusions to produce high-performance battery systems and packaging. Select the vehicle below to learn ...

Through an extensive catalogue of fabrication capabilities, including high accuracy CNC machining and MiG / TiG welding, we can ...

The battery pack is formed by collecting several modules adding a battery management system (BMS) and a cooling device. Cells come together to become modules, and modules come ...

Maximize energy density and safety with Guangdong Sungalead's fully automatic Double module extrusion machine. PLC-controlled precision + real-time pressure sensing for ...

Constellium offers complete aluminum solutions--rolled and extruded--for modern battery systems, including foils, connectors, thermal and enclosure components. Designed to boost ...
