-----

The Berlin-Brandenburg region is making a valuable contribution to the development of smart grids, storage concepts and innovative solutions for ...

The newly founded Berlin Battery Lab (BBL) combines the expertise of the German Federal Institute for Materials Research and ...

Berlin has established itself as an important location for research into sodium-ion batteries and lithium-sulfur batteries. The city offers concentrated expertise in these areas, ...

The newly founded Berlin Battery Lab (BBL) combines the expertise of the German Federal Institute for Materials Research and Testing (BAM), the Helmholtz-Zentrum ...

Li-S batteries are the most promising high energy density batteries for transportation and large-scale grid energy storage applications in the near future. Most of the reported activities on Li-S ...

The lab will pool the expertise of the three institutions to advance the development of sustainable battery technologies. The joint ...

Berlin's lithium battery storage solutions offer more than energy backup - they're strategic assets enabling cost control, sustainability compliance, and energy resilience.

The BAM, the Helmholtz-Zentrum Berlin (HZB), and Humboldt University of Berlin (HU) have signed a memorandum of understanding (MoU) to establish the Berlin Battery Lab.

The lab will pool the expertise of the three institutions to advance the development of sustainable battery technologies. The joint research infrastructure will also be open to ...

The Berlin-Brandenburg region is making a valuable contribution to the development of smart grids, storage concepts and innovative solutions for sector coupling between energy ...

To counteract these problems, an open-source battery storage system will be developed that offers a solution for both a home storage system and an integrated photovoltaic system.

As a leading containerized energy storage factory, we don't just assemble parts; we engineer reliability. We control the entire integration process--from the Battery ...
