You know, Cairo's facing a renewable energy paradox. The city's solar generation capacity jumped 40% last year, but blackouts still hit 12 districts during July's heatwave.

12 September, Cairo/Oslo: Scatec ASA has signed a USD denominated 25-year power purchase agreement (PPA) with Egyptian Electricity Transmission Company (EETC) for a 1 GW solar ...

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased ...

But here's the twist: Egypt's capital is quietly becoming a sandstorm of innovation in energy storage systems. With solar irradiance levels that could make a sunflower jealous and wind ...

Ever wondered how Cairo, a city drenched in 300+ days of annual sunshine, still struggles with power outages? The answer lies in one phrase: solar energy storage.

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling ...

Virtual storage for large energy generation systems is implemented by connecting all energy supply sources, conventional or renewable, to a common massive electrical grid; the demand ...

Egypt's new Net Metering 2.0 scheme --launched last Tuesday--now offers \$0.043/kWh for grid-stabilization services. That's 22% higher than 2024 rates, making storage economics viable ...

AMEA Power, one of the fastest-growing renewable energy companies, signs Power Purchase Agreements

(PPAs) to develop largest solar PV in Africa and first utility-scale ...

Virtual storage for large energy generation systems is implemented by connecting all energy supply sources, conventional or renewable, to a ...

Can batteries solve Egypt's Electricity oversupply problem? Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt ...
