Explore how Chile is advancing its clean energy transition with significant developments in renewable energy and battery storage.

The Chilean solar market is booming but as curtailment grows, a hybrid approach to generation is gaining ground. Storage project announcements are coming thick and fast as ...

The Quillagua solar-plus-storage installation, located in Chile's Antofagasta region, is a 221-MW solar photovoltaic plant with 1.2 GWh of ...

Set to be built in seven phases in total, the Oasis de Atacama complex will comprise 2GW of solar PV and 11GWh of battery storage in total, presuming the entire project proceeds ...

Located in the Atacama Desert in northern Chile, this megaproject will have a total capacity of 2 GW of photovoltaic generation and 11 GWh of lithium-ion battery storage, ...

Three greater than 100 MW renewable energy projects are under development and will have a lithium-on battery storage component.

Set to be built in seven phases in total, the Oasis de Atacama complex will comprise 2GW of solar PV and 11GWh of battery storage in ...

Chile's energy storage boom is driven by the need to optimize intermittent renewable sources like solar and wind. By storing excess energy during peak production and ...

Codelco, Chile's state-run copper producer, is working with SQM to extract lithium in Chile from 2031 to
