-----

In a groundbreaking shift from coal to clean energy, China has launched the world's largest floating solar farm atop a flooded former coal mine in Huainan, Anhui Province.

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

China's solar sector advances with CSP tower completion, international project growth, and market resilience.

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry ...

China's first gigawatt-level offshore photovoltaic (PV) project, the world's largest open-sea solar installation, has been fully connected to the grid.

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and ...

Support CleanTechnica's work through a Substack subscription or on Stripe. When I started covering the solar industry, the largest solar power project in the world had 100 ...

In a groundbreaking shift from coal to clean energy, China has launched the world's largest floating solar farm atop a flooded former ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...
