---

In CY2024, China hit a new record of annual net new capacity added to the grid at 429GW, a 21% y-o-y increase. Of this, wind and solar power combined capacity accounted for 83% at ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

In 2020, China saw an increase in annual solar energy installations with 48.4 GW of solar energy capacity being added, accounting for 3.5% of China's energy capacity that year. 2020 is ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

China's solar and wind operating capacity has soared to 1.4 TW and now accounts for 44% of the world's operating utility-scale solar and wind capacity, more than the combined total of the ...

China's first gigawatt-level offshore photovoltaic (PV) project, the world's largest open-sea solar installation, has been fully connected to the grid.

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentives

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. ...
