Through this partnership, the companies will collaborate to build, own, and operate solar-powered mobile base stations in underserved areas of the Democratic Republic of Congo (DRC).

Together, they will build, own, and operate solar-powered mobile base stations in underserved regions of the Democratic Republic of Congo (DRC), aimed at extending network ...

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy

consumption and high electricity costs of 5G base stations.

With the money, Nuru will increase its urban microgrids in Congo to four, from one, and be able to produce 13 times as much electricity.

To support the connectivity plans, the duo have pledged to jointly build up to 2,000 new solar-powered base stations over the next six years, which will provide 2G and 4G connectivity.
