The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel.

You'd think an island blessed with year-round sunshine would've cracked the code on renewable energy storage. Yet Cuba's power outages increased by 23% in 2023 despite adding 450MW ...

According to information provided by the Cuban newspaper Granma, only four of the projects that will be operational this year have a 50-MW battery storage system.

On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges.

Cuba aims for solar energy growth, but lacks essential battery storage. Explore the challenges and solutions.

The Cuban Electric Union announced the installation of the first battery container. For the Energy Storage System (BESS in the Spanish acronym) in the Holguin municipality of ...

Enter energy storage - the Swiss Army knife of modern power systems. While Cuba's current storage capacity could fit in a Havana parking garage, the 2024 blackout ...

Approximately every six weeks in Cuba, the unreliable and outdated electric grid plunges the majority of the country into darkness -- sometimes for days at a time. Now, a ...

The installation of solar energy storage batteries began this Saturday at four electrical substations in Cuba.
