How many MW of energy storage projects will be online?

The dashboard presents statewide information for the first time and features data on more than 122,000 residential, commercial, and utility-scale battery installations. CEC staff is tracking another 1,900 MW of energy storage projects expected to be online by the end of the year for a total of 8,500 MW.

How many MW of energy storage will be built in SCE?

Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801. To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational.

How many MW of energy storage capacity is needed by 2045?

The state is projected to need 52,000 MW of energy storage capacity by 2045 to meet electricity demand. "Energy storage systems are a great example of how we can harness emerging technology to help create the equitable, reliable and affordable energy grid of the future," said CEC Vice Chair Siva Gunda.

Why are energy storage resources important?

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy sources. Currently 23 states, plus the District of Columbia and Puerto Rico, have 100% clean energy goals in place.
