What is the JB® Glass Rail System?

The JB® Glass Rail system is a widely used railing system in both commercial and residential work, adaptable to both indoor and outdoor applications. Items required for this railing system are in stock in substantial quantities for prompt shipment. Request your copy of our test report or download it here.

What are the components of a glass railing system?

Key components of a glass railing system include: Glass Panels: Made from strong, safety-tempered or laminated glass. Fasteners: The hardware used to hold the glass panels, such as base rails, standoffs, spigots, or clamps.

What is a glass railing system?

Glass railing systems are commonly used for balconies, staircases, decks, terraces, and pools, where unobstructed views are desired. Framed Glass Railing: Features glass panels held within a visible frame, often made of aluminum or stainless steel. This type offers significant structure and blends elegance with strength.

Which spigot system is best for glass railing?

For a clean, frameless glass railing with minimal hardware and maximum impact, our spigot systems are the ideal choice. Easy to install and perfect for open, modern spaces, spigots hold glass panels securely at the base--no posts or framing needed. The result: clear views and a sleek, minimalist look.
