What is a dual battery system?

A dual battery system keeps everything isolated, safe, and properly charged using a DC-DC charger, solar panels, correct fusing, and quality cabling. In short: A dual battery system gives you guaranteed power off-grid without risking your ability to start the vehicle. Think of your 4WD power system as a chain -- every link matters.

Do you need a dual battery for camping?

Just keep in mind: The more devices you bring camping, the more power you'll need. And the more power you need, the more expensive your dual battery setup will become. Cost is an important factor in all our decisions. And we're sure it is for you as well!

How does a lithium dual battery system work?

Whether camping, overlanding or on a road trip, your lithium dual battery system will keep your devices and appliances running without a hitch. Plug your fridge into the 12V socket and charge your mobile devices from the fast-charging USB-A and USB-C ports.

How do two batteries work in a car?

It gives you two independent power systems inside one vehicle: The two batteries communicate through a charging device but remain isolated so one can never drain the other. Here's the 2026, easy-to-understand breakdown:
