---

At the 2025 student-led MIT Energy Conference, energy leaders from around the world discussed how to make green technologies competitive with fossil fuels.

BEI Construction has the engineering, electrical and implementation expertise required on energy storage construction projects (BESS) and can deliver battery-based energy storage as part of ...

The chapter examines both the potential and barriers to off-grid energy storage (focusing on battery technology) as a key asset to satisfy electricity needs of individual households, small ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

A hydropower project that works like a giant water battery, storing enough energy to power 50,000 homes during cyclone season. That's exactly what the Port Vila Front River ...

This article explores its strategic location, innovative technology, and how it aligns with global energy storage trends - while answering the burning question: Where exactly will this critical ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

A tropical paradise where coconut trees sway and massive energy storage tanks hum quietly in the background. Welcome to Port Vila, where a large energy storage tank isn't ...

Following this milestone, the upcoming Renewable Energy Solar and Storage on Efate and Tanna (RESSET) project will add 5 MWp ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

Without proper energy storage tanks, those shiny new solar panels become useless at sunset. In 2025 alone, an estimated 18% of generated renewable energy went unutilized across Vanuatu ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.
