The new regulation, officially issued after completing administrative steps, will require projects of more than 20 megawatts to ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

Under this grant, the Santo Domingo Tribe plans to design a photovoltaic system for the community water pump and treatment facility to offset the maximum amount of electricity ...

new regulation, officially issued after completing administrative steps, will require projects of more than 20 megawatts to include at least 50% battery storage capacity.

The project will include the installation of an energy storage system of 27.5 MW/110 MWh, the commission said. A day earlier, Vice President Pena opened the La ...

This new resolution establishes more favorable conditions for the processing of concessions for electricity generation projects under a special regime that integrate storage systems (BESS), ...

Well, Santo Domingo's new 120MW/240MWh battery storage project proves sunshine alone won't solve our energy problems. As climate change intensifies hurricane patterns, the Dominican ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate ...

The new regulation, officially issued after completing administrative steps, will require projects of more than
