-----

By the end of the year, the station will have 168 stalls on a 1.5-MW grid service, the rest being powered by solar panels and Megapack energy storage batteries. Tesla announced ...

Tesla's latest electric vehicle charging station will use the sunny California skies to power its Superchargers. The 168-stall facility on 30 acres near Lost Hills, California, is ...

Solar-powered Superchargers help avoid massive new loads on already stressed electrical grids, especially during peak afternoon and ...

On Tuesday, Tesla announced that all Superchargers are now open for business at its largest charging station ever. The 164-stall location in Lost ...

Solar-powered Superchargers help avoid massive new loads on already stressed electrical grids, especially during peak afternoon and evening hours, when demand is the ...

The backbone of the site is its energy system, which combines a large solar array with substantial on-site storage so that the station can keep operating even when grid conditions are tight.

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.

Tesla has opened the first part of a massive solar Supercharger project in California, featuring solar canopies, Megapacks, and more.

As the world's largest Supercharger station, powered almost entirely by its own solar array and massive
