How many mobile networks are there in Finland?

Meanwhile, mobile networks offering speeds of 300 Mbps were available to 60% of households in about 1% of Finland's land area. 5G base stations, which numbered almost 3,000 in total, could be found in 109 municipalities. At the same time, 100 Mbps 4G networks covered 17% of the land area and 93% of households.

Which areas in Finland have a new mobile network technology?

Major road networks are also among the first areas to receive new mobile network technologies. In late 2020, 100 Mbps 5G networks covered 17% of Finland's main roads and highways and 18% of the railway network, while 100 Mbps 4G coverage was available on 57% of both networks.

Who dominates the telecommunications market in Finland?

The country has a competitive telecommunications market dominated by three key players: Elisa, Telia, and DNA. Elisa held the largest share of revenue from fixed-line, mobile, TV, and radio operations, at 37 percent in 2023. Telia Finland, part of Telia Company since 2017, followed closely, while DNA held 23 percent of the market.

Who dominates the 5G market in Finland?

The 5G market in Finland is dominated by three key players, Elisa, Telia, and DNA. The coverage of 5G in the country is challenged by a vast contrast between urban and rural areas.
