-----  
How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource. Ascend Analytics is administering the request for proposal (RFP) on behalf of Georgia Power.

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

Will Georgia Power add storage to solar projects?

In its IRP, Georgia Power detailed adding storage to solar projects, saying that its adoption of solar+storage versus solar-only generation at sites is currently at 17%. Georgia Power first examined energy storage in its 2019 IRP, with approval to build, own and operate 80 MW of BESS at the time.

When will a Georgia Power RFP be available?

Projects online by Nov. 28, 2031, will be given preference. The RFP targets energy storage capacity included in the company's integrated resource plan approved by the Georgia Public Service Commission in 2022. The solicitation is part of Georgia Power's ongoing efforts to add renewables and bolster the reliability of its electric grid.
