This publication is designed for those individuals overseeing procurement for the local government they serve with the goal of helping them develop successful RFPs for solar ...

This article is the first of a two-part series that will explore the role the federal government and state and local governments play in building out a national EV charging network.

This publication is designed for those individuals overseeing procurement for the local government they serve with the goal of helping ...

The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and ...

In this paper, a novel bidding space model is constructed for PSCs, which dynamically integrates electric vehicles, photovoltaic generation, and energy storage.

Below are descriptions and resources for ongoing Joint Office funded research and analysis projects ranging from soft costs related to building infrastructure to cybersecurity best practices.

We propose a novel bidding space model that effectively captures the competitive and cooperative interactions among multiple charging stations.

FEMP's frequently asked questions on the scope of 42 U.S.C. includes guidance on the use of ESPCs to procure EVSE and components of EVs. Can Federal agencies use ...
