Is Greece preparing a new 3.5 GW energy storage program?

A decision published by Greece's Ministry of the Environment and Energy in the State Gazette last Friday was a surprise for the domestic energy storage sector. The ministry ran a public consultation in late February, proposing a new 3.5 GW energy storage program.

What is Greece's new battery storage program?

Greece's new battery storage program has taken into account the areas most congested by the output of renewable power stations as well as the kind of renewable projects connected to the grid.

What is the future of battery storage in Greece?

Overall, following last months public consultation, the Greek ministry of the environment and energy presented a bolder and even more ambitious battery storage program, allowing for longer completion times but retaining the financial and competition guarantees in place.

Will Greece install 900 MW of storage by 2030?

According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030. Thus far, 900 MW has been allocated via the Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) tenders. Therefore, the remaining share would be delivered under the new plan but without any subsidy support.

What's Next for Greek Energy Storage? As Greece finalizes its National Energy & Climate Plan (NECP), expect more hybrid projects combining pumped storage with emerging tech.

Currently there are four (4) storage plants operating in Greece, two open-loop pumped-hydro storage (PHS) stations in the mainland (700 MW in total) and two small hybrid RES-storage ...

Following a brief consultation in late February, the Greek government has unveiled a new battery storage program targeting 4.7 ...

Greece is already preparing its third battery energy storage tender, making it one of the most advanced

markets in Europe, but acceleration is also evident in the pumped storage ...

The Greek Ministry of Energy and Infrastructure has increased its target for a merchant standalone battery energy storage ...

According to IPTO data, curtailments reached 228 GWh in 2023, soared to 900 GWh in 2024, and already hit 975 GWh in the first ...

Following a brief consultation in late February, the Greek government has unveiled a new battery storage program targeting 4.7 GW of utility-scale, standalone projects which will ...

In this article, we provide a summary of the key points of the Ministerial Decision. Classification and capacity caps for eligible BESS projects. The decision classifies eligible ...

The new plan, prepared by the Ministry of the Environment and Energy, calls for installing 4,700 MW of standalone battery projects across the country, equal to the entire ...

According to IPTO data, curtailments reached 228 GWh in 2023, soared to 900 GWh in 2024, and already hit 975 GWh in the first five months of 2025. The total for the year is ...

Among these projects is the groundbreaking pumped storage hydropower (PSH) project in Amfilochia. At a development cost of more than EUR600 million, it is the largest investment in ...

The Greek government has opened for applications a programme that will subsidise businesses to install energy storage systems, either as part of new solar projects or ...
