Where can I find the best price on shipping containers?

Here at Budget Container Sales we can help you find the best price on standard shipping containers, reefer containers, and custom modified containers. You'll find high quality containers made from 14-gauge corrugated steel making them a great way to safely and securely store things outside or transport them.

How much clearance do you need for a cargo container?

You need about 20 feet of overhead clearance as well. Containers must be placed on firm ground such as pavement, grass, dirt, or gravel. If you are looking to use a cargo container for something other than on site storage or transportation of goods, then you might be interested in a modified container.

How much does a WWT container cost?

You should expect to pay between \$2,700 and \$3,500 for a cargo worthy container. WWT containers have been used to transport cargo several times, but they are no longer shipping worthy. They will almost always have some rust, dents and scratches, but they can be used as an affordable way to store things conveniently on site.
