-----  
How do battery cabinets work?

The battery cabinets use convection cooling to regulate internal component temperature. Air inlets are at the bottom and in Large Battery Cabinet also in the front of the cabinet and outlets are on the rear of the cabinet. Clearance must be allowed in front and rear of each cabinet for proper air circulation.

How do you put a battery cabinet aside a ups?

Carefully slide the battery cabinet off the pallet. Now the battery cabinet is ready to be placed aside the UPS. Both sides can be used for battery cabinet placement but for easier service access to UPS, on the 93PM 30-150 kW UPS right side is preferred, and on the 93PM 160-200 kW left side is preferred.

Is the battery cabinet safe?

The properly installed enclosure is earthed and IP21 rated against foreign objects and is safe to operate. However, only qualified personnel are allowed to install and service the battery cabinet. This equipment contains LETHAL VOLTAGES. All repairs and service should be performed by **AUTHORIZED SERVICE PERSONNEL ONLY**.

What should I do if my ups battery goes bad?

Contact your service representative for battery maintenance. Battery replacement and maintenance should be performed only by authorized service personnel. Before scrapping UPS or its battery cabinet, the battery bank must be removed. Local requirements must be followed in battery recycling or discard.

Ensure the necessary air flow rate for the ventilation of the battery cabinet location. Ensure adequate air ventilation to locations where batteries or ...

This document contains important instructions that must be followed during the installation, operation and maintenance of the external battery cabinet and the batteries.

Do not attempt to stack the battery cabinet. Attempting to stack the battery cabinet may cause permanent damage and create a potential for serious personal injury.
