When will 5G be available in the Philippines?

In June 2019, Globe Telecom introduced the Philippines' first next-generation network, and in December 2019, AT&T launched a consumer service in the United States that expanded nationwide during 2020. Commercial 5G deployment expanded rapidly through 2020.

How does 5G work?

5G networks divide coverage areas into smaller zones called cells, enabling devices to connect to local base stations via radio. Each station connects to the broader telephone network and the Internet through high-speed optical fiber or wireless backhaul.

What is 5G New Radio (NR)?

The 5G New Radio (NR) interface defines two main operating ranges: Frequency Range 1 (FR1) - below 7.125 GHz, also called sub-6 GHz. It covers low- and mid-band frequencies and supports channel bandwidths up to 100 MHz. Typical download speeds range from 5 to 900 Mbit/s depending on conditions.

How much does a 5G plan cost?

In the United States, mobile operators continued to sell 4G plans at lower prices than 5G plans. Typical 5G plans cost about US\$85 per month for premium data tiers. ^Hoffman, Chris (January 7, 2019).

MTN Group is pleased to announce the official commercial launch of 5G networks in Benin and the Republic of Congo, reflecting our commitment to delivering leading digital ...

5G is the fifth generation of cellular network technology and the successor to 4G. First deployed in 2019, [1] its technical standards are developed by the 3rd Generation Partnership Project ...
