How much do solar panels cost in the Philippines?

Solar panel prices in the Philippines vary based on property type and other factors. For commercial properties, prices typically range from PHP20,000 to PHP30,000 per kilowatt, while residential installations usually cost between PHP30,000 and PHP50,000 per kilowatt. The cost of individual panels depends on their wattage, efficiency, and brand.

Are solar panels a good investment in the Philippines?

Yes, investing in solar panels is a good idea in the Philippines. With the right system, our clients experience 30% to 70% savings on their electricity bills, with some even reaching a zero bill. The payback period for a solar system in the Philippines is typically between 3 to 5 years, after which the savings go straight to your pocket.

Where to buy cheap solar panels in the Philippines?

The cheapest offers of solar panels in the Philippines can usually be found in online stores or solar equipment distributors. There we can find opportunities for panels from lesser-known brands at promotional prices. However, when buying a very cheap panel, you should be careful about unfair offers and contraband.
