How much does a commercial fire suppression system cost?

Fire Suppression System: Costs can range from \$1,500 to \$30,000 or more, depending on the size of the area to be protected and the type of suppression agent used. Investing in a commercial fire protection system is a critical decision for business owners to safeguard their property, assets, and most importantly, the lives of occupants.

How much does a fire suppression system cost in 2025?

The cost of fire suppression systems in 2025 varies based on multiple factors. Here's a detailed breakdown:

Sprinkler Systems: Typical commercial fire sprinkler systems cost \$1.50-\$3.00 per square foot for new construction and \$2.00-\$7.00 per square foot for retrofits. Specialized high-pressure systems may cost more.

How do I estimate the costs associated with a fire protection system?

Estimating the expenses associated with commissioning a fire protection system not only involves knowledge of construction and equipment costs but also a deep understanding of data analytics, risk assessment, and operational benchmarks.

How do I calculate the cost of a fire alarm system?

To estimate the cost of your system, find the approximate volume of your room by multiplying L x W x H and finding the corresponding value for that volume. If you need assistance in determining a system cost for your facility, please contact a Pye-Barker Fire & Safety representative.
