How much can you earn selling energy back to the grid?

How much you can earn by selling energy back to the grid depends on a few key factors: your energy usage, how many kilowatt-hours (kWh) your solar system generates, and the incentives offered by your state and utility company. Here's a deeper look:

How do electricity generators make money?

Electricity generators earn profits by producing power at wholesale prices and selling them to the grid for a markup. Consumers, on the other hand, can also benefit financially from sending electricity back to the grid from solar systems or other distributed energy resources.

How much money can you earn from selling electricity?

The amount of money you can earn from selling electricity depends on your place in the market. Registered electricity generation plants earn wholesale electricity prices for their power, while consumers can earn retail credits. Let's look at each in more detail.

How do you sell electricity back to the grid?

Another way to sell electricity back to the grid is by net metering. One reason for net metering is that, especially on sunny days, solar panels produce an excess amount of energy. When that happens, the excess gets sent back into the grid and redistributed throughout your community to houses and businesses that need more energy.

If you want to make money by selling electricity back to the grid, you'll have to generate more than you use. Before you embark on ...

Numerous factors shape the overall cost of selling electricity from energy storage power stations. Initially, capital costs associated with technology installation, including ...

If you want to make money by selling electricity back to the grid, you'll have to generate more than you use. Before you embark on the installation, study your electricity bill to ...
