In this study, different scenarios of integrated solar technologies and air conditioning systems for providing the energy demand of the Center of Excellence (SCE) building in the Sustainable ...

Dubai is close to having awarded the entire planned 5 GW capacity of the MBR Solar Park. With EWEC planning 7.3 GW by 2030 and some smaller projects, the national ...

Solar-assisted absorption chillers reduce reliance on grid electricity by up to 40%. These systems use solar thermal energy to power cooling processes, making them ideal for ...

Navigating the city will be effortless, thanks to an extensive 7-kilometer air-conditioned promenade. This ...

With a production capacity of approximately 37,000 cooling tons, the new plant will serve residential buildings, commercial complexes, and hotels in this popular Dubai district.

ABSTRACT It is the aim of this paper to investigate the potential of applying solar air conditioning and solar refrigeration in Iran. The motivation for this research is the growing energy use in the ...

"We have many techniques we can use to reduce heat, and we can actually borrow from what happens in the Middle East and look at Iran or look at Dubai and Turkey."

Solar-assisted absorption chillers reduce reliance on grid electricity by up to 40%. These systems use solar thermal energy to ...

"The electric motor and pump of the air conditioner are completely waterproof and consume less when they are launched as compared to other motors. This reduces energy ...

Navigating the city will be effortless, thanks to an extensive 7-kilometer air-conditioned promenade. This network connects all major facilities, allowing visitors to move ...

Dubai is close to having awarded the entire planned 5 GW capacity of the MBR Solar Park. With EWEC planning 7.3 GW by 2030 ...

"The electric motor and pump of the air conditioner are completely waterproof and consume less when they are launched as ...
