One thing's certain--Bloemfontein's storage policy isn't just solving today's crisis. It's writing South Africa's energy playbook for the next decade.

To support large regions increasingly dependent on intermittent renewable energy, Stanford scientists are creating advances in fuel cells, hydrogen storage, flow batteries, and traditional ...

With our Head Office in Bloemfontein and branches in Kimberley, Gauteng, Cape Town, Johannesburg, Gqeberha, George, Centurion and Durban we are able to distribute to ...

Scheduled for completion in Q3 2025, this 800MWh lithium-ion facility will store enough energy to power 350,000 homes during evening peaks. What makes it special?

With frequent load-shedding and growing solar adoption rates (up 47% since 2022), the city requires smart storage solutions that work seamlessly with existing infrastructure.

That's exactly why the Bloemfontein Domain Energy Storage Power Station isn't just another infrastructure project - it's the region's new energy insurance policy.

With rolling blackouts costing the Free State province over R12 billion annually [1], the city's 2025 storage projects could finally turn the tide. But why focus on energy storage rather than just ...

South Africa's first public battery storage tender has awarded preferred bidder status to a consortium of CIP-owned Mulilo and renewables major EDF for three battery projects totalling ...

A 99.9MW energy storage project in development in northern England by Renewable Energy Systems (RES)
