How do tax credits & rebates make solar more affordable?

Tax credits and rebates make solar more affordable in different ways. A tax credit is claimed when you file your tax returns, while a rebate is a partial refund you get after buying solar panels. These are dollar-for-dollar reductions in the income tax you owe.

Which states offer solar rebates & tax credits?

Solar rebates, tax credits, sales tax exemptions and other incentives vary significantly from state to state. Arizona, Hawaii, Massachusetts, New Mexico, New York, South Carolina and Utah offer personal tax credits to encourage solar installations.

Who qualifies for a solar tax credit?

How to qualify: The solar tax credit can be claimed by homeowners or renters installing a photovoltaic solar system on a residential home in the U.S. Landlords or property owners installing solar panels on homes they don't currently live in aren't eligible.

Can you get a tax credit for energy efficient HVAC systems?

The federal government offers tax credits for homeowners who install energy-efficient HVAC systems. Under the Energy Efficient Home Improvement Tax Credit (extended through 2025): Credit Amount: Up to 30% of the cost of the system, with a maximum of \$600 for air conditioning units and \$2,000 for heat pumps.
