In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution. There are plans to build new generati...

Listen to this article (JUBA) - The Ministry of Health of South Sudan has commissioned a new solar power system at its headquarters in Juba, marking a transition ...

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

The Deputy Minister of Information, Communication, Technology and Postal Services Dr. Jacob Maiju Korok on Friday said ...

The Juba Solar Power Station is a proposed 20MW solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, ...

The Juba new outdoor power transfer approach isn't just another tech trend - it's rewriting the rules of energy distribution. From boosted efficiency to extreme weather resilience, these ...

South Sudan has taken a transformative step toward sustainable energy by launching its first solar power plant. Built by Egypt's Elsewedy Electric, the 20-megawatt power ...

The Deputy Minister of Information, Communication, Technology and Postal Services Dr. Jacob Maiju Korok
