Who makes bifacial solar panels?

JA Solar, Jinko, Trina, Canadian Solar can be listed among most popular bifacial solar panels manufacturers. Solar experts see great potential in bifacial modules and expect them to become more and more popular, which means we can expect more and more brands to start making them.

What is a bifacial solar panel?

A bifacial solar panel is a PV module with two active sides. Instead of a white or black back sheet on the rear side, it has another layer of glass that protects solar cells. It often doesn't have a frame. How do bifacial solar panels work? The front side of a bifacial panel works just like any normal panel would do.

Which solar bifacial panels are cheapest?

The cheapest panels come from China. For example, Trina Solar bifacial panels are a solid choice: the company is known to be modern and innovative. Today this company competes in Top-5 world's solar brands and offers a diverse product line with relatively low prices. Another good choice would be LONGi Solar bifacial panels.

How efficient are bifacial solar panels?

There are several. For starters, bifacial solar panels efficiency is higher than standard. Mono-side panels have a 17-21% energy conversion rate on average. When the rear side of a bi-module works at full capacity, its efficiency can reach 25-27%. Thus you need much less space to build a powerful solar system.

Shop bifacial solar panels with dual-glass technology for max efficiency. Capture sunlight on both sides. Ideal for commercial and high-yield installs.
