---

Designed with vertical hot air discharge, QSK60 Series Containerized Generators is suitable for multiple site installations, with flexible layout and footprint saving.

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or ...

Our factory-packaged containerized generator sets are designed to address these challenges comprehensively. They offer a reduced footprint, improved ease of transportation and ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 ...

Gas engine containers are used for a wide variety of applications and can be single or dual fuel units. The containers can be equipped for heat recovery, emissions reduction, absorption ...

Built for resilience, this compact, containerized generator is the ideal choice for data centers, disaster recovery, large construction projects, telecom operations, and industrial facilities.

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized ...

The Twin Power container solution is a container that combines two engine/alternator assemblies with/without CHP in a 40ft container, making it perfect for applications that require variable or ...

This pioneering project features two fully independent generator modules--one atop the other--each in its own container. As TellhowPower's first experimental deployment of this ...
