-----

Australian technology company Lavo's innovative energy storage system - based on storing green hydrogen in a patented metal hydride - has attracted the attention of the UK government ...

Elegant storage system LAVO is an innovative, integrated hybrid hydrogen battery that, when combined with a rooftop solar system, provides a sustainable, reliable and renewable green ...

Store excess solar power safely with our metal hydride home hydrogen storage system. Combines magnesium-titanium technology for efficient, long-term energy independence.

LAVO's Hydrogen Energy Storage System (HESS) combines patent pending metal hydride storage technology with a lithium-ion (Li-ion) battery, fuel cell, electrolyser, and innovative ...

Instead of using large, pressurised tanks, the hydrogen is safely absorbed into solid-state metal hydride storage, which makes it stable, compact, and ready for long-term use. In essence, the ...

The LAVO(TM) Green Energy Storage System acts as a solar sponge, integrating with rooftop solar to capture and store renewable green energy for use when it is needed.

Founded in 2020, this Sydney-based firm is developing the world's first integrated hybrid hydrogen battery that combines with lithium-ion technology and rooftop solar to store and deliver ...

Developed in partnership with UNSW and Design + Industry, LAVO(TM) is a hydrogen hybrid battery that stores over 40kWh of electricity - enough to power the average Australian home for 2 ...

LAVO(TM) combines with rooftop solar panels to capture and store renewable green energy for use when you

need it. The world's first integrated hybrid hydrogen battery represents a crucial part ...

Developed through 7 years of R& D in Australia, the Lavo system captures excess solar/wind energy to split water molecules into hydrogen. This gas gets stored in metal hydride tanks at ...
