Do energy storage tolling agreements restrict a developer's use of a battery?

As the energy stored in the battery belongs to the buyer, energy storage tolling agreements will often prohibit or restrict the developer's use of the storage system for station service. The inclusion of this condition requires that the developer enters into a retail service contract for the system's non-storage load.

What is an energy storage tolling agreement?

Under an energy storage tolling agreement, the developer of the energy storage system is responsible for obtaining site control, permits, interconnection rights, equipment, and construction contracts, as well as achieving agreed-upon milestones such as a target commercial operation date and a guaranteed commercial operation date.

What is a long-term service agreement contractor (LTSA)?

A Long-Term Service Agreement Contractor (LTSA) is a specialized provider that ensures the continued performance, maintenance, and optimization of energy infrastructure under a structured contract. These agreements are critical in the renewable energy industry, where reliability, efficiency, and cost control determine long-term success.

What is stem's long-term service agreement (LTSA)?

Provide system-level support. With Stem's Long Term Service Agreement (LTSA), customers keep that flexibility plus gain more cost-effective conversions of productized hardware with comprehensive services. We wrap the entire system to give you a co

Below you can download two sample battery & energy storage tolling agreements--an Energy Storage Facility Agreement from ...

Open Solar Contracts streamlines project development and finance processes by offering simple and universally-applicable legal agreements that make contracting much faster and less ...

Long-term Services Agreement (LTSA or O& M agreement) The program will provide a blueprint for project
