-----

We work hand in hand with architects and design professionals creating their designs with photovoltaic glass. Our designs are flexible enough to adapt to any project needs, no matter ...

These essential components help keep your curtain wall system airtight and watertight. Made from silicone or rubber, they seal the joints between glass panels and the ...

We work hand in hand with architects and design professionals creating their designs with photovoltaic glass. Our designs are ...

It combines PV power generation technology with curtain wall technology, which uses special resin materials to insert solar cells between glass materials and convert solar energy into ...

Spandrel panels are used in the areas of a curtain wall that don't require visibility. These are typically the opaque sections between floors or the ...

Spandrel panels are used in the areas of a curtain wall that don't require visibility. These are typically the opaque sections between floors or the portions of the facade that cover the ...

By integrating semi-transparent thin film solar glass into the roof or sidewalls, these greenhouses provide optimal light transmission for crop growth ...

Discover the trend of curtain walls in commercial architecture, with considerations for product selection, components, installation, and performance.

This glass fits seamlessly into any curtain wall system--single, double, or triple low-e glazing options--while cleverly concealing junction boxes and wiring for a streamlined look.

By integrating semi-transparent thin film solar glass into the roof or sidewalls, these greenhouses provide optimal light transmission for crop growth while simultaneously generating renewable ...

All Curtain walls manufactured by Gain Solar are made from durable architectural tempered glass. The benefit of good quality photovoltaic glass curtain walls is that they require less maintenance.
