How much does a shipping container cost in 2024?

Let's get into the shipping container market prices for 2024. The prices show substantial variations that depend on container conditions and locations. The current market shows new one-trip shipping containers ranging from \$2,800 to \$7,800. Used containers give buyers more budget-friendly options at \$1,400 to \$3,500.

How much does a shipping container cost?

The current market shows new one-trip shipping containers ranging from \$2,800 to \$7,800. Used containers give buyers more budget-friendly options at \$1,400 to \$3,500. Containers with special features like double doors or open sides naturally cost more. Here's a breakdown of current market prices: Container prices vary substantially by location.

Why are used container prices so volatile?

Used container prices tend to follow new container manufacturing costs, but they typically lag 8-16 months behind new price surges. Interestingly, used container prices tend to be more volatile and overshoot new prices similar to other well known commodity pairs such as gold/silver.

Why are container manufacturing costs so high?

Currently container manufacturing costs are up, over 21% higher today than in 2016. Prices in 2016 through 2018 were affected by an industry change from oil (solvent) paints to water based. Retooling and adjusting factory processes is expensive and the prices through late 2018 reflect these challenges.

Access the world's largest container marketplace with verified inventory and transparent pricing across 2,500+ locations worldwide.
