Spirit of America worked in Mongolia to provide local herders with a well and a greenhouse to increase their economic independence and help build national resiliency.

Despite the active promotion of vegetable growing by the government, domestic production supplies only half the country's needs, making Mongolia highly dependent on imports.

Despite the active promotion of vegetable growing by the government, domestic production supplies only half the country's needs, ...

This book targets farmers or organizations willing to build their own solar greenhouse. It gives them practical guidelines to construct the ...

Working in partnership with GERES, the Foundation aimed to increase food security and income in the Arkhangai and Khentii provinces, by helping develop quality vegetable production.

As dawn breaks over a photovoltaic greenhouse in Ulanqab, solar panels tilt to greet the sun while lettuce seedlings bask in optimized glow. This isn't some sci-fi fantasy - it's today's reality in ...

Inner Mongolia is a key business area for greenhouse builder Kingpeng. The main project types are large multi-span glass ...

This book targets farmers or organizations willing to build their own solar greenhouse. It gives them practical guidelines to construct the greenhouse. If they don't have construction skills, ...

Inner Mongolia is a key business area for greenhouse builder Kingpeng. The main project types are large multi-span glass greenhouses, with a few solar greenhouses, primarily ...

Since 2010, Le Geres has been supporting the inhabitants of rural areas in Mongolia in the construction of bioclimatic greenhouses. Without the help of photovoltaic panels, these ...

Solar greenhouses, used in cold regions like China, Central Asia, and the Himalayas, are designed with a half-roof and three walls, facing south to maximize solar ...
