Will Delhi be equipped with 'South Asia's largest battery energy storage system?

Power Minister Ashish Sood on Wednesday announced that Delhi is set to be equipped with "South Asia's largest" utility-scale standalone Battery Energy Storage System (BESS).

Will Delhi's first standalone battery energy storage system improve power supply?

Delhi's first standalone battery energy storage system will enhance power supply for 100,000 consumers, ensuring reliability during peak demand and outages.

How long does it take to build energy storage in India?

Fast-ramping energy storage like the Delhi system can be built in a matter of months to provide critical flexibility to wherever needed on India's grid. In comparison, older technologies such as pumped hydroelectric energy storage can take years to build and are highly dependent on geographical locations.

Once completed later this year, the 10 MW solution will enable better peak load management, add system flexibility, and enhance reliability for more than 7 million customers ...

10 MW energy storage system at Tata Power Delhi Distribution's Rohini Substation to provide better peak load management, system flexibility and reliability to more than 2 million ...

The Asian Development Bank (ADB) is providing financing to Tata Power Delhi Distribution Limited towards a 10MWh battery storage pilot project in Delhi, India.

In the Indian metropolis, a new 10-MW grid-scale battery storage system is paving the way for wider adoption of the solution to stabilise the grid as it integrates renewables.

Delhi's first standalone battery energy storage system will enhance power supply for 100,000 consumers, ensuring reliability during peak demand and outages.
