What types of solar systems are available in New Zealand?

Single phase and multi phase systems are available, either grid connected or totally independent of the grid. We specialise in Off Grid Solar Energy solutions which we offer New Zealand wide. Our team will travel to you to complete the installation personally to the highest standard.

How many kWh will a small off grid solar system provide?

Allowing for this, the PS: Tiny off grid solar system will provide an estimated 4kWh per day. The exact number of panels needed depends on your situation. Get in touch and we can check your situation.

What does an off-grid solar package include?

Our off-grid solar packages include everything you need to go off the grid in New Zealand: solar panels, batteries, charge controllers, inverters, cables, and DIY-friendly manuals backed by exceptional customer support. Each of our off-grid solar systems includes everything you'll need to go off the grid - and full installation instructions.

Should you go off-grid in New Zealand with solar power?

Going off-grid in New Zealand with solar power represents both an exciting opportunity for energy independence, a cheaper operational cost of living, and a material contribution to sustainable energy generation. This comprehensive guide will help you understand how off-grid solar works -- and what it takes to get it right.

We will explain why solar photovoltaic containers are particularly suited to the New Zealand context with the help of technology, real cases, and practical advice.

This off-grid solar system excludes the generator and installation (ask us for options). Your package includes the components below and is easily expanded based on your region's ...
