Are bifacial solar panels excluded from tariffs?

As a result of the public input received, USTR announced certain products would be excluded from tariffs in September 2018,²⁵ and excluded further products in June 2019, including bifacial solar panels that absorb light and generate electricity on both sides of the panel (bifacial modules).²⁶

How many exclusions are there for solar manufacturing equipment?

Exclusions for solar manufacturing equipment, reduced to 14 from the 19 initially proposed: USTR's May Notice proposed 19 exclusions covering solar manufacturing equipment: five for equipment to manufacture solar modules; six for solar cells; and eight for solar wafers.

What is the USITC's "safeguard" policy on solar cells and modules?

The USITC conducts an ongoing review of 201 measures, and the President may determine that modifications, reductions, or termination of safeguard actions may be appropriate.²³ Since 2018, "safeguard" measures on Chinese-produced solar cells and modules have been in place and have been extended through 2026.

This policy brief provides an overview of the primary provisions of U.S. trade law that have been used to address trade ...

As the world accelerates toward net-zero targets, renewable energy equipment exports are becoming a major driver in global trade.

Some of the crucial resources and technologies like solar power, wind energy, hydropower, turbines, and bioenergy are being exported in a wide array to different targeted ...

This policy brief provides an overview of the primary provisions of U.S. trade law that have been used to address trade concerns in clean energy.

Solar energy can be harvested via several methods, notably through photovoltaic (PV) technologies and

concentrated solar power (CSP) systems. Each method has unique ...

Winning Strategies from Top Exporters Alright, enough problems--let's talk solutions. Here's how the successful players are dominating foreign trade in energy storage systems:

Some of the crucial resources and technologies like solar power, wind energy, hydropower, turbines, and bioenergy are being ...

"Port Newark Container Terminal (PNCT) is one of the only Container Ports in the World to use part of its active operational footprint (10 acres) that provides a dual purpose, in ...

This article explores the benefits of FTZs for the solar energy industry, how tkSCS leverages these zones to provide unparalleled logistics support, ...

Discover how smart solar policies like incentives, regulations, and infrastructure investments empower countries to boost clean energy production and export excess power globally.

This article explores the benefits of FTZs for the solar energy industry, how tkSCS leverages these zones to provide unparalleled logistics support, and why solar companies should ...

Explore essential regulations on solar energy export and trade, including licensing, tariffs, trade agreements, and regulatory challenges shaping the market.
