---

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) ...

On October 18, NYSERDA filed its Bulk Energy Storage Implementation Plan Proposal (the "NYSERDA Proposal"), the last document needed for PSC approval before ...

Today, the U.S. Department of Energy released its draft Energy Storage Strategy and Roadmap.

This is where new energy storage planning becomes the ultimate kitchen organizer. Globally, the energy storage market is projected to grow at a 33% CAGR through 2030, ...

The optimal locations and capacities of energy storage systems are determined using YALMIP toolbox and the beetle swarm optimization (BSO) algorithm, and the proposed ...

Energy storage (especially long-duration and multi-day storage) may be able to resolve both transmission security constraints and provide flexibility value to the grid

In June 2024, Governor Hochul announced that the Commission had approved a new Energy Storage Roadmap for the state to achieve a nation-leading six gigawatts of ...

This paper presents an innovative capacity expansion planning framework for long-term planning to determine the optimal size, type, and location of energy storage and ...

This paper establishes a mathematical model for optimal sizing of energy storage in generation expansion planning (GEP) of new power system with high penetration of renewable ...

This comprehensive evaluation framework addresses a critical gap in existing research, providing stakeholders with quantitative references to guide the selection of storage ...
