-----

Private mobile networks based on LTE and 5G are now at the core of this transformation -- offering the performance, flexibility, and security required to manage modern power plants and ...

At present, the research and application of power wireless private network mainly focus on the following two aspects: multi-base station networking through base stations and ...

Private mobile networks based on LTE and 5G are now at the core of this transformation -- offering the performance, flexibility, and security ...

Base stations represent the main contributor to the energy consumption of a mobile cellular network. Since traffic load in mobile networks significantly varies during a working or weekend ...

Sensor nodes within WSN have limited power, resulting in a reducing lifespan, especially in human-inaccessible locations. This paper reviews the energy-efficient protocols ...

In this paper, we investigate the optimization of smart grid-enabled mobile networks, in which green energy is generated in individual BSs and can be shared among the ...

In order to meet the requirements of clean and low-carbon indicators in the new power system, while introducing clean energy into the base station system of the

This paper analyzes the sleep probability and power consumption model of distance-aware micro base stations in sleep mode of heterogeneous cellular networks in urban areas and proposes ...

Relying on 3739 dedicated base stations, State Grid Jiangsu has built the largest and most capable broadband

wireless private network in China that covers all major power supply areas ...

Aiming at the problem of mobile data traffic surge in 5G networks, this paper proposes an effective solution combining massive multiple-input multiple-output techniques ...

Relying on 3739 dedicated base stations, State Grid Jiangsu has built the largest and most capable broadband wireless private network in China ...

Sensor nodes within WSN have limited power, resulting in a reducing lifespan, especially in human-inaccessible locations. This paper ...
