Do foldable containers reduce container fleet management costs?

The effect of foldable containers on the costs of container fleet management in liner shipping networks. Maritime Economics & Logistics. 2012. Vol. 14. No. 4. P. 455-479. DOI: 10.1057/mel.2012.16. Shintani, K. & Konings, R. & Imai, A. Combinable containers: A container innovation to save container fleet and empty container repositioning costs.

Do foldable containers generate revenue?

However, this does not generate revenue and incurs container management costs (CMCs). Some container carriers may use foldable containers (FLDs), such as four-in-one designs, instead of standard containers (STDs), in order to minimize the costs associated with relocating empty containers.

Can FLDS reduce empty container port handling time across shipping routes?

We conclude the following: FLDs can reduce empty container port handling time across shipping routes, especially short-distance routes with high TI ratios. The mixed fleet of FLDs and STDs lowers shipping costs, especially for shorter routes.

Are containerships more cost effective than STDs?

be more cost - effective than STDs, especially for extreme trade imbalance (TI) lanes. Information Administration). Containerships consume much fuel that is sensitive to bunker costs resulting in longer transit times and lower customer satisfaction.

With a preferred share of this market anticipated for the foldable steel containers with rapid industrialization, strong manufacturing growth, and logistics activity, Asia-Pacific is ...

The major purpose of this study is to discuss conditions required for successful commercial application of foldable containers, based on a cost-benefit analysis precisely for ...

Container leasing rates have soared, with some trade routes experiencing price increases of at least 50% since the start of the year.

Abstract--This study investigates the commercial viability of foldable containers from a carrier's perspective. A cost-benefit and sensitivity analysis is conducted for operating regular and ...

ESD foldable containers are not only cost-effective but also reduce environmental impact by supporting circular logistics.

Through intensive computational experiments, we analyze the effect of the imbalance in demand and the decreases in the purchasing cost and the handling cost of foldable containers on the ...

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and ...

Complete breakdown of shipping costs from the US to Southeast Asia. Get current FCL/LCL rates, tariff impact details, and cost reduction strategies for 2025.

FLDs can be folded and bundled four high when repositioned, reducing space by 75%, aiding efficient utilization, and lowering the handling burden at ports, meaning they may be more cost ...

Folding containers have emerged as a transformative packaging solution, particularly in industries such as food and beverage, electronics, and e-commerce. Their cost ...

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and installing facilities that accommodate ...
