-----  
Can you put solar panels on a roof?

Ground mounts are more common for certain types of solar systems, like off-grid setups. But they can be used by anyone if they have the space! There are other options if your roof isn't suitable for solar panels; you can also consider a solar carport, a solar patio, or even a solar tree!

Should you install solar panels on the ground?

Additionally, if you don't have the extra space, installing solar panels on the ground will leave little to no room for your lawn, flower beds, or other landscaping. If that's important to you, then rooftop panels may be a better option. Ground mounts are more common for certain types of solar systems, like off-grid setups.

Are ground-mounted solar panels right for your home?

Many homeowners opt for ground-mounted solar panels for several reasons. Ground-mounted panels are positioned optimally for maximum sun exposure, especially if the property doesn't have heavy tree cover. If maximum efficiency is your goal, ground mounts can be your best pal.

Should you install solar panels on a slanted roof?

On flat ground, you can position solar panels in any direction you want to maximize sun exposure, unlike on a slanted roof. This advantage means ground panels often receive more sunlight, allowing them to generate more solar power, thus saving you more money.
