Skeleton Technologies is an Estonian energy storage developer and manufacturer for AI data center, transportation, grid, and defence applications. Skeleton is developing a novel raw ...

Skeleton positions itself as the only fully integrated European high-power-storage company, covering raw materials through to cells, modules, systems and software.

The German-Estonian company Skeleton Technologies has opened a new factory for supercapacitors in Markranstadt ...

BERLIN, July 19 (Reuters) - Estonian energy storage tech firm Skeleton Technologies will build a new factory, planned by Siemens (SIEGn), for supercapacitors near Leipzig, Germany, ...

Founded in 2009, Skeleton's supercapacitors are used in transport, grid, industrial, and automotive applications and allow to reduce CO2 emissions and save energy.

"Wrightbus is working with world-class leaders such as Skeleton Technologies for supercapacitors. Supercapacitors and fuel cells are the ideal combination for better ...

Founded in 2009, Skeleton's supercapacitors are used in transport, grid, industrial, and automotive applications and allow to reduce CO2 ...

We turn our material-based advantage into high-performance energy storage to accelerate electrification in the transportation, grid, industry, and automotive sectors.

Skeleton's supercapacitor cells are unique in the world of supercapacitor energy storage. Protected by more

than 30 patent families covering everything from the raw material to the ...

SECH designs, develops and supplies customized energy storage and power delivery solutions based on ultracapacitors, also known as supercapacitors for applications in automotive, mass ...

The German-Estonian company Skeleton Technologies has opened a new factory for supercapacitors in Markranstadt near Leipzig. Around twelve million cells are to be ...

SECH designs, develops and supplies customized energy storage and power delivery solutions based on ultracapacitors, also known as ...
