---

Due to its favourable geographical location, Slovenia has a great potential for increasing its proportion of solar energy used. In 2020, a total of 11,990 solar power plants with a total ...

Slovenia has established ambitious renewable energy targets, aiming to install 1.6 GW of capacity by 2030 and 2.2 GW by 2040. ...

The most notable growth was in the electricity sector, where the share of renewable energy increased by 4.88 percentage points over the previous year, reaching 41.89%, largely due to a ...

Slovenia has established ambitious renewable energy targets, aiming to install 1.6 GW of capacity by 2030 and 2.2 GW by 2040. The national strategy specifically calls for ...

Renewable energy includes wind, solar, biomass and geothermal energy sources.

Experts estimate that Slovenia could meet more than a third of its electricity demand through solar power, but this would require ...

To increase low-carbon electricity generation, Slovenia should invest in the expansion of its successful nuclear and solar capacities.

Electricity generation from solar, measured in terawatt-hours.

Experts estimate that Slovenia could meet more than a third of its electricity demand through solar power, but this would require prioritizing decentralized, community ...

Director Nina Hojnik told the total includes 191.5 MW of residential installations, 100.8 MW of commercial

and industrial (C& I) projects, and 6.5 MW of utility-scale capacity. ...

Lignite deposits are found in the north central and northeastern regions of Slovenia; the country does not have any identified hard coal reserves. There is one active lignite mine in Slovenia, near Velenje in the north central region of the country. The mine produced 3.2 million tonnes of lignite in 2018 for combustion in the neighboring Sostanj Power Plant. The mine is Slovenia's only producing fossil fuel facility. The power plant has an expected closure date of 2033 nonetheless...

The most notable growth was in the electricity sector, where the share of renewable energy increased by 4.88 percentage points over the previous ...
