What is a CATL Tener energy storage system?

CATL TENER energy storage system has three outstanding characteristics: First, the world's first 5-year zero attenuation system, which can be mass-produced; The second is to achieve high energy of 6.25 MWh in a standard 20-foot container; The third is a dedicated quality management system for energy storage to build ultimate safety.

Is tener the new energy storage solution for stationary energy storage?

CATL, the leading manufacturer of lithium-ion batteries, has made a significant return to the spotlight within the stationary Energy Storage sector with the introduction of its new product, TENER. This system has been touted as an innovative solution within the energy storage landscape.

How much energy does a tener battery store?

Tener also packs 6.25MWh of energy storage capacity into a 20-foot container, the highest Energy-Storage news is aware of for a lithium-ion BESS unit, significantly above the 5MWh-per-unit that appears to have become the standard for BESS products from China.
